

# Using beamer as default font

---

This shows an example slide where `defaultfont=beamer` has been set as option to the `ulund` beamer theme. It will use the default beamer fonts in both headings and slides.

First some math

$$f(x) = 1 + \sum_{i=0}^5 x \cdot \frac{5+x}{x^3} \quad (1)$$

Followed by some monospaced text.
