

Using lu as default font

This shows an example slide where `defaultfont=lu` has been set as option to the ulund beamer theme. It will use the Lund University profile fonts, i.e., Adobe Garamond Pro as serif in headings, and Frutiger Std as sans-serif on slides.

First some math

$$f(x) = 1 + \sum_{i=0}^5 x \cdot \frac{5+x}{x^3} \quad (1)$$

Followed by some monospaced text.
